

Pure air.

You will notice, once it is there.

Professional solutions for clean indoor air

Our high-quality air cleaners provide a healthy and safe environment by removing air pollutants like odour, dust, smoke, grease and other interferences. Our air cleaners can be equipped with different filters that enable you to solve almost any problem you may have with air quality in your company.

EUROMATE OFFERS ALL-IN SOLUTIONS FOR AIR CLEANING

Euromate has over 40 years of experience in the field of air cleaning. This provides in-depth knowledge of indoor air and removal of air pollutants. For optimal use of the air cleaner regular maintenance by a professional is recommended. A service contract can be agreed with our sales organization. There are various maintenance agreements possible, depending on the filter choice and the degree of air pollution.

Solutions for air purification

Pollutants that are often invisible to the naked eye can influence indoor air quality. Unpleasant odours, fine dust, tobacco smoke or grease particles can affect your staff's health and slow down working processes. Euromate offers a wide range of air cleaners to improve the indoor air quality of your company.

Odours can be very annoying and cause hindrance. This problem is known in various indoor environments. Euromate can easily solve odours problems with customised air cleaners.

Airborne dust particles have a negative impact on the performance of people and processes. Euromate provides a wide range of professional air cleaners to remove all kinds of dust particles.

Smoke is unpleasant and causes health issues. For instance, tobacco smoke relates to legislative issues and can affect your company's image. Euromate offers different solutions to capture smoke.

Due to the build-up of grease in kitchen exhausts, the risk of fire increases. Also, odours are transported with grease particles. Euromate's air filters remove even the smallest grease particles.

Besides odor, dust, smoke and grease, there are many other types of air pollutants, such as mercury vapor in dental practices. We offer solutions for almost every problem and will be happy to give you professional advice.

Odour solutions

Unpleasant odours can be very disturbing and cause hindrance. Is this an issue you can relate to? The problem is known in many indoor environments like professional kitchens, nursing homes, sport canteens, nurseries, hospitality facilities or offices. We can easily solve your odour problems with our customized air cleaners.

In practice, our air cleaners work in different stages from coarser to finer particles and gases. By combining various types of pre-filters and main filters, we can target the different causes for odours and eliminate them instantly. Have a look at our specialised air cleaners or contact us for free individual advice.

OUR SOLUTIONS FOR ODOUR

VisionAir CarbonMax

The carbon filter in the VisionAir CarbonMax is very effective in extracting odours and gases. It is the perfect solution for hospitals, printing firms, fitness centres, nurseries or hospitality facilities.

SFC

The SFC filter system can adsorb odours and gases out of an exhaust system. It can be easily installed downstream in an extraction duct or used as final filter for kitchen air filtration.

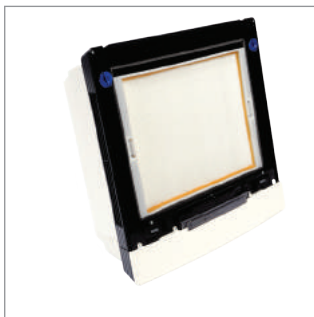

Dust solutions

Airborne dust particles can cause headaches, discomfort or irritated eyes and airways. Additionally, they slow down the production of your business. Our commercial air cleaners are especially suitable for dusty environments such as schools, archives and libraries. Are you rather looking for solutions in logistics, manufacturing, wholesale, retail or waste? Our free-hanging industrial air cleaners offer the perfect solution for you.

Both our commercial and industrial air cleaners work with sustainable principles. Our industrial air cleaners can be equipped with filters which can be cleaned and reused. The dust filters in our commercial air cleaners are made from reinforced environmentally friendly paper which is folded in such a way as to create an extremely large effective area of several square meters. Have a look at our commercial and industrial air cleaners or contact us for free customised advice.

OUR SOLUTIONS FOR DUST

VisionAir MediaMax

The VisionAir MediaMax is the ideal solution for fine dust or pollen. As a result, the air cleaner is especially suitable for dusty environments such as schools, archives and libraries.

Grace MediaMax

The Grace MediaMax contains a unique filter system that extracts fine particles, such as dust, pollen and bacteria. The air cleaner is the best solution for colleagues who suffer from sick-building syndrome.

HFE

The HFE is a very effective and efficient system for filtering dust particles in industrial buildings. Additionally, the air cleaner can be used to excerpt welding fumes from oil treated steel.

Cairry

Cairry is the solution for dust-free construction and renovation work. This portable air cleaner is compact, lightweight, low-noise and therefore the perfect partner for your next construction project!

Smoke solutions

Smoke, in particular tobacco smoke, is unpleasant and causes health issues for your staff. We offer a complete program of solutions to capture smoke so that your business stays within the legal obligation and keeps its positive image. Together with Euromate you can remove unpleasant (tobacco) smoke from workplaces in your company.

For tobacco smoke, depending on the space that is available in your company, you can choose to set up a smoking room or place a smoking cabin. The latter occupies little space and can easily be placed anywhere. Please have a look at our smoking cabins and air cleaners, ashtray, and smoking table for smoking rooms. Or contact us for free advice so that we can find the best solution for your company.

OUR SOLUTIONS FOR SMOKE

VisionAir ElectroMax

The VisionAir ElectroMax is an electrostatic air cleaner that is especially suitable for removing tobacco smoke and is therefore the perfect solution if you plan to set up a smoking room.

Grace ElectroMax

The Grace ElectroMax effectively cleans smaller rooms from tobacco smoke and odours. It is the most suitable solution if your smoking policy allows low-intensity smoking in certain rooms of your company. It is also perfect for filtering the pollution of occasional smoking at home.

Smoke 'n Go smoking cabin

The Smoke 'n Go smoking cabin is flexible in size and equipped to fit regular smoking intensities in any private or public building. It removes unpleasant odours and tobacco smoke as well as improves the general indoor air quality.

Smoking table

The Euromate smoking table is a comfortable lean-to table that consists of a synthetic table top and thick-walled, hand-polished stainless steel. It is heat and scratch resistant.

Grease solutions

Professional kitchens create grease and odours every day as a result from fumes released during cooking. Filtration is essential to make sure that grease does not settle in the ductwork and therefore prevents fires and reduces cleaning costs. Additionally, kitchen grease filtration avoids residuals of cooking odours. We offer a professional range of filter units for your kitchen air extraction.

The filter structure of our products ensures that the extraction volume always remains at the same level. The filters can easily be cleaned so the air cleaner continues to function optimally. By combining various types of pre filters and main filters we compose a filter application that applies to your needs. Please have a look at our kitchen fume filters or contact us directly for free individual advice.

OUR SOLUTIONS FOR GREASE

SFE

The SFE can capture the smallest grease particles out of the exhaust of your commercial kitchen and can be easily installed in the extraction duct of a downstream in the extraction hood.

Other solutions

Besides odor, dust, smoke and grease, there are many other types of air pollutants, such as mercury vapor in dental practices. We offer solutions for almost every problem and will be happy to give you professional advice.

Whether you are looking for a solution to remove pollen, viruses, soot, microbiological contamination, aerosols, gases like mercury vapour or hair particles. Our air cleaners are equipped with one or more dedicated filters which extract the different pollutants and feed the cleaned air back into the room. Please contact us directly so that we can find the best solution for your company.
